Acrylic flame-retardant board is a type of flame-retardant PMMA, transparent, with a fire resistance rating of V0, high hardness, and non warping surface. It is commonly used in oil stations, airports, shopping malls, home furnishings, displays, buildings, and other places where flame retardancy levels are required.

Application industries: various industries with requirements for fire protection and explosion prevention, such as construction, shipbuilding, decoration, advertising, oil stations, chemical industry, and instrument equipment

Product characteristics:

- (1) Safe and aesthetically pleasing
- (2) Uniform flame retardant
